No. 6

AL KLASSEN FOR PRESIDENT OF THE ENGINEERING SOCIETY

Fellow Schoolmen—

On Friday, March the second, you will choose the executive which is to guide the ship of School through another glorious year. Your Executive needs capable men with sufficient "Experience". Since the President of the Engineering Society accepts the greatest responsibility and since he is chief executive, it is absolutely essential that he has sufficient knowledge of every branch of the office.

However, these are not the only qualifications a President must have. He must be willing to sacrifice his own time for the sake of the Engineering Society. He must show ability to organize and also be able to obtain maximum co-operation from all the men. It would not be sufficient for him merely to keep up the high standard of School activities but rather he should show a desire to improve upon them in every way. You must also keep in mind that he must have a knowledge of the business of the Engineering Society. Then there is a qualification called "Drive"—upon this

AL KLASSEN

MURRAY McCULLOCH

MURRAY McCULLOCH FOR PRESIDENT OF THE ENGINEERING SOCIETY

We now find our Engineering Society in the 59th year of existence. It has, for some time now, been the greatest undergraduate Engineering Society anywhere in the British Empire. Not only is this true, but at home on this very campus it is hailed second to none as the faculty which leads and points the way.

Such achievements as these are not commonplace, but are due to strong and vigorous leadership which has shown continued initiative through these many years. In short, the responsibility for the success of our Society in the future as in the past faces upon the shoulders of the executive, the most important office of which is that of President.

Therefore, without hesitation, do we take pleasure in introducing Murray McCulloch, candidate for the office of PRESIDENT OF THE ENGINEERING SOCIETY.

Murray has been Secretary of the Engineering Society and is at present fulfilling his duties as Treasurer. Dur-

(Continued on page 3)

DUNC WHITE FOR PRESIDENT OF THE ENGINEERING SOCIETY

Men of 4T5, 4T6, 4T7 and 4T8, the time to cast your ballot for the 1945-46 executive is close at hand. Make your choice a wise one.

To School, the members of the Engineering Society Executive are the leaders whose first and foremost duty is to carry out the wishes of the students. To have this body function with the utmost efficiency and harmony, it must have as its head a president who commands and is worthy of representing you at all

He must have a sincere interest in all phases of undergraduate life—scholastic, athletic and social. In addition he must have energy and zeal enough to carry out his task.

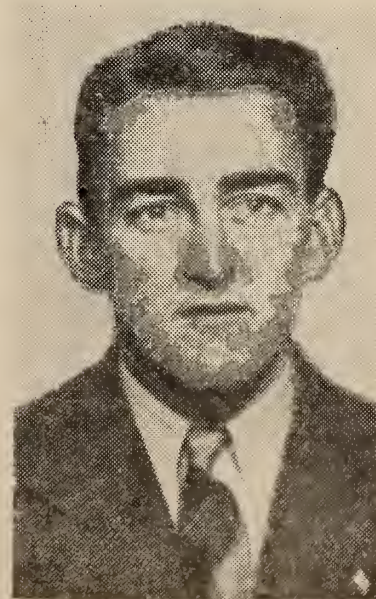

To my mind your candidate DUNCAN WHITE offers you this leadership ability. During his S.P.S. life he has served in such capacities as

Secretary—Civil Club

Vice-President—II year

President—III year

In addition to his School experience he has had six years' business training out in the world, all of which fits him for the position of PRESIDENT.

DUNC WHITE

EDITORIAL

"The old order changeth. . ."

Once again, the time is here when the Engineering Building turns into a veritable madhouse with records blaring, candidates shouting, and all the posters which help make School Elections so colorful.

And amid all this tumult and shouting, candidates "go to the Engineers" as Schoolmen perform their responsibility of electing men to the control positions in the Engineering Society and the other societies about School.

It can safely be said that every man nominated is a good man. Every man nominated is sincere. However, due to previous experience, more extensive grounding and organizing ability, some men are *better*. But among the better ones, running for each office, *there is a BEST!!!!*

You have had an opportunity of meeting the men who will be asking for your vote this Friday. It is your privilege and right to vote and it is your duty to find out which are the men best suited and to vote for them.

This is no time for politics or favourites. School needs the best men in control—not necessarily your best friends, the men with the most appealing promises or the biggest campaigns.

Let's all vote on Friday, Schoolmen, and may the *BEST* men win!!!

KLASSEN

(Continued from page 1)

may depend the success or failure of a School year.

In the past few years Al has taken part in numerous campus activities. In his second year, as president of the Class of 4T6, he directed the first Freshman initiation to be held at Varsity Arena. He also organized all the social functions for that year. In his third year he again assisted with the Freshman Reception. As Second Vice-President of the Engineering Society he became acquainted with the business end of the Society. Among other things he was Chairman of the War Services Drive and organizer of the Co-Ed Contest. He was also a member of the School At-Home committee.

NO OTHER CANDIDATE can equal his experience.

THE PRESIDENT'S MESSAGE

Once more, election time has rolled around at the "Little Red Schoolhouse" and bringing with it one of the best times to be remembered of the school year. The "politicians" will wallpaper the walls of the building with their propaganda, the "boys" will travel north to the King Cole Room to discuss the big elections and then return to join in the big parade to Hart House for lunch. After lunch, when the voting has taken place down at "School", the gang will leave to further their studies in acoustics at the well-known Opera House down town and will proceed to put on a better show than those who are being paid to do it.

But I want to inject here a bit of serious advice. Please do not forget when this revelry is going on, that we are still students during wartime and subject to public criticism. There should be no attempts made to organize a parade of any sort down town nor should any of the faculty buildings be invaded because this will bring strong repercussions. So use your heads.

May I take this opportunity of wish-candidates and may the best man win. ing the very best of luck to the various

Your President,

BOB MOORE.

PROGRAMME

At 11:55 noon on Friday, Engineers will meet in front of the Engineering Building to parade to Hart House for Dinner. The Parade will be led by the C.O.T.C. Pipe Band.

The polls will be open from 12.30 until 2.00.

McCULLOCH

(Continued from page 1)

ing his stay in the latter office he has had the privilege of acting as finance officer for the Freshman Reception, the School Dinner, School Nite, and School At-Home. He also played an active part on a board of planning for accommodation of discharged servicemen in the summer course here this year, and took an active part on the organizational committee of the first annual campus Navy Ball.

Not only has Murray had the necessary experience for such a post, but he confines the best qualities of leadership with the essentials of versatility and foresight. He will keep "School" always before him in his mind. Keep School in your mind also, and vote MURRAY McCULLOCH FOR PRESIDENT.
